GRANITE FROST-TOP DROP-IN MODULE REF: DIF1-4

Rotisol's line of Granite Frost Top Drop-Ins provides the most attractive way of displaying and maintaining your cold products for hours. It is ideal for buffet lines, salad bars, sandwich, or desert stations.

Thanks to our unique patented system, the cold is uniformly diffused across the entire surface of the granite slab. Our thermostat control allows the unit to maintain the temperature at the required 32°F.

The drop-in can be installed on any counter. The control panel is connected with a cord so that it can be placed in the most convenient location. The drop-in is fully insulated and is provided with a factory bracket either located on the top or the bottom for flush finish! Units come with no groove.

Rotisol granite tops are available in Absolute Black or Sarde White (white with grey and black flecks), whichever best compliments your display area. Other colors and types of stone can be used, but are not supplied by Rotisol.

DIF1
Shown with
Absolute Black Granite

STANDARD FEATURES

- All Stainless Steel
- 40" power cord length allows flexibility in placement of controls
- Control panel with regulated temperature digital settings and on/off switch
- Remote control panel
- Granite : black absolute

MODELS	OPTIONS	FINISH
